

Big Doings In Hill Country For Brangus Breeders

Brangus breeders from throughout the United States will converge on the Texas Hill Country during the International Brangus Futurity and associated activities June 1-3.

The Gillespie County Fairgrounds is

Fredericksburg will be the site of the Open and Junior Futurities on Friday, June 2nd with the open show kicking off at 8:00 a.m. and the junior show following in the afternoon. A seminar for Brangus breeders will be held at the Futurity location on Thursday at 8:00 p.m. and the Texas Brangus Breeders Association has scheduled their annual summer meeting for noon the same day in nearby Kerrville.

On Saturday eight following the Futurity shows the Hill Country Brangus Breeders Association will conduct the Miss America Sale at the River Hill Country Club in Kerrville. This sale features 10 highly selected Brangus female show prospects and proves show winners. The semi-annual Country Club Hill Country group will have their Top of the Crop Sale with 60 females and several bulls.

WE HAVE BEEN LEARNING THE BRANGUS BUSINESS SINCE WE PURCHASED OUR FIRST REGISTERED ANIMAL IN 1947, AND WE'RE STILL LEARNING. HOWEVER, THE FIRST LESSON WE LEARNED WAS TO SATISFY THE PEOPLE THAT SHOWED ENOUGH FAITH IN US TO PURCHASE OUR CATTLE. AT M RANCH, CUSTOMER SATISFACTION IS OUR NUMBER ONE PRIORITY. IF THE PEOPLE THAT USE M RANCH CATTLE ARE SATISFIED, THEN WE'RE OUR SECOND GOAL OF HAVING ONE OF THE BEST HERDS IN THE BUSINESS IS NOT FAR OFF. OUR CATTLE ARE FULLY GUARANTEED BECAUSE THEY REPRESENT THE PEOPLE AT M RANCH. THAT'S THE WAY WE DO THINGS AROUND HERE.

The Breed You've Been Waiting For...

For years, cattlemen have sought the perfect breeding combination that would give them animals they could depend on for consistent profit.

To make it in today's cattle business, farmers and ranchers must have a breed that is consistently profitable. This means cattle must breed on schedule and calve easily, gain quickly on range grass and the less expensive feeds, be disease resistant and cost little to maintain. At the same time, the carcass must grade choice with consistency and be preferred by packers and consumers.

After studying all the different breeds and crosses, more and more cattlemen are finally discovering the perfect breed for today's market — BRANGUS!

The key is the 3/8 Brahman-5/8 Angus combination. This heritage yields animals that show consistent profit. Brangus give you the most pounds of meat at the lowest possible cost, and at the same time bring top prices at the stockyards and in the supermarket.

Hardy! Adaptable! Profitable! BRANGUS!

The breed you've been waiting for.

The all out war again cars has resulted in higher and higher prices as these people have lacked all manner of so-called Safety Devices, Pollution Controls, Noise Controls, Rust Controls, Mileage Controls, and this list can go on and on and on.

For instance, take Amtrak. Here is a hodgepodge that is costing hundreds of millions of dollars and while there is some joy obtained by riders who sit in any hurry and like to live in the past, passenger travel by rail is so lackluster about as practical as the horse and buggy. A fun thing that just ain't practical when you want to move people from

here to there. Amtrak not only drains tax money down the rat hole, but it does damage to tax payin' citizens who offer for better and quicker service like buses and airlines, etc.

It just don't seem possible for some of these people to understand the fact that the bulk of the people in America don't have subways or elevated to move even from one side of town to the other and that has transportation in most towns and cities is either infrequent or lackin' altogether.

It seems the War Against Automobiles got off to a flyin' start when Ralph Nader published a book called "Unsafe at Any Speed", a tome which was later completely discredited, but the damage was done. Nader got the headlines and the Transportation Department tests which proved him wrong were buried or not reported. Nader claimed the Corvair was more dangerous than other cars, but as usual did not present one scrap of comparative data, an oversight the public seems to have missed.

What makes automobiles such an inviting target for the snake oil peddlers in the Reform Ranks is the fact that only buga corporations are capable of makin' cars at prices we can afford and which

perform with safety and efficiency. The Editor.

PS: Uncle Dunk reports now the FDA has discovered something called cancer. It seems likely the California will spend \$200 million trying to turn it off. Dunk says his life that no one, no law, no intelligent, efficient and sensible, Jimmy Carter does it in less than a couple of years ago he would have managed to make Congress pass a cent. accusation that the "new" deal from the bottom of the barrel affairs is a gittin' a lot of life from the new people but from the bankers who were too timid to deal in similar fashion. Dunk says that this country needs a more poll. It could be called the "rassad Poll" and it could be used to plumb the thoughts of the Secretary to what next they might do to make and me more uncomfortable. For instance, Dunk notes where USAID, Clow Tucker Foreman has agreed to allow bacon, sausage, ham, etc. beed ed bacon, sausage & ham even though don't contain nitrates or nitrites. Gosh couldn't think of some other name right off hand — These Brothers!

Ever this, The Editor.

Shorthorns have always had the ability to grade choice, so when you put it together here is a breed that does it all. Through the efforts of ASA's advancement programs and study and research by individual breeders Shorthorns' improvement is increasing all the time. No frills... no fancies. Just a breed that means higher profits for you. And that's no bull!

A LOT OF BULL?

You bet.

Just ask Shorthorn producer Bob Fuller of Steamboat Rock, Iowa. He reports bulls that are born unassisted, that wean at 516 pounds, and that gain 4.20 pounds per day on a 140-day test, and that weigh 1,189 pounds at one year.

Brahman Steer Is Houston Show Carcass Champion

Houston — A medium weight Brahman steer owned and exhibited by Elizabeth Morrison, 14-year-old FFA member from Boerne, Texas, was selected as the Grand Champion of the Junior Steer Show Carcass Contest of the 1978 Houston Livestock Show, Rosewood champion honors went to 16-year-old Sheryllyn Holcomb, Martine Coty 4-H member, for her heavy weight Limousin steer.

The winning steers, selected from the top 188 entries in the live competition of the junior steer show, were judged on quality, cutability, carcass weight and shape. Judge for the contest was Dr. Frank Ortiz, extension specialist, Texas Agricultural Extension Service, Texas A&M University.

The grand champion weighed 1020 pounds live and was the third-place medium weight Brahman steer. The carcass graded out at USDA low choice and had a rib eye area of 14.1 square inches. The yield grade was 1.8 with an estimated percentage of chuck, round, loin and rib of 53.8. Other statistics included fat thickness of .35 inches and percentage kidney fat of 2 per cent.

The carcass contest was comprised of steers that competed in the 14 broad shows making up the junior steer show. The top four steers in each breed show class — heavyweight, mediumweight, end lightweight — are automatically entered and scheduled for slaughter and carcass competition.

Ortiz evaluated the carcass data and selected the top ten carcasses. Grand end reserve honors are awarded to the top two ranking carcasses, respectively. To be eligible for placing and premium, carcasses must grade USDA low choice or better, and be a yield grade 1.8 or less.

The grand champion, Sheryllyn Holcomb, provides premium awards for the top ten steers. Additionally, the American Brahman Breeders Association will present Elizabeth with a check for \$500 for exhibiting the grand champion of the Texas Livestock Association will present Sheryllyn with \$125 for exhibiting.

AVOID CHANGING WEATHERS
FOR MANY YEARS
Perma-Press are molded urethane,
more wear resistant than nylon.
Perma-Press will outlast leathers 10
to 1. Their tapered design allows only
1/8" wear, instead of 5/8" of a leather.
Much less friction for easier
pumping extends cylinder life greatly.
Perma-Press must be used in a good
or new cylinder, as they do not swell.
Install Urethane Perma-Press, Urethane
Pump Rod-guides, and don't pull
that well for many years. Thousands
are in wells that have not been released
in 8 years! All are available in
standard cylinder and pipe sizes. Write
or call for our catalog. We ship same
day order is received. This is our 20th
year serving ranchers.
